

New at Motiv-E: LEASE PLANS

The future of driving is electric, there's no doubt about that. It's only a matter of time before all of Holland goes electric. For Motiv-E, that future started a few years ago, and since 1 November 2020 they plan to go live with a leasing service as well. 'We want to make switching to electric cars a breeze for SMEs with small vehicle fleets', explains Robert Vermeulen, business manager at Motiv-E. 'Our mission is to make driving electric as accessible and affordable as possible, with a view to the environment, a love of electric cars and personal service for our customers.'

LEASE PLANS

Motiv-E has a range of leasing options. 'We have four different lease plans', says Robert. Full Operational, Net Operational, Financial and Private lease. So we can offer a lease plan to suit every customer.' Leasing has all kinds of benefits, according to Robert. 'It saves you time, you outsource the management and admin, and it's off-balance financing. Also, the costs are the same from month to month and we help you develop your fleet policy and keep it up to date. But Motiv-E is more than just a leasing company. It's also a platform with articles and advice on how to make the transition as easily as possible. 'We not

only offer products – like cars, charging stations, solar panels, e-bikes and e-kick scooters – but also key knowledge and knowhow about those products.'

IMPORTERS THROUGHOUT EUROPE

Having built up a wide network of contacts with importers throughout Europe, Motiv-E has a solid supply chain, says Robert. 'In the Netherlands, delivery times for electric cars tend to be extremely long, or they can't be supplied at all. Thanks to our network, we can supply large volumes quickly, and have the fastest delivery times in the Netherlands.' It also lets Motiv-E offer some

unique perks, like hard-to-find electric vehicles, attractive discounts and even vehicles that aren't available yet on the Dutch market. At Motiv-E, it's all possible.

FULL PACKAGE

With Motiv-E as your partner, you get full-service mobility. 'Our new lease activities now let us offer a full package for businesses, structured around e-mobility and the transition to that for everyone from small independent contractors to SMEs', Robert concludes. 'Our sustainable and practical mobility solutions are tailored entirely to our customers' wants and needs. We make it all possible!'
